

## At Last – Real Help to Learn MetaStock

Book Review of ***MetaStock in a Nutshell***

By Simon Sherwood

RRP \$24.95 ISBN 1876627956

I have lost count of how many times people have asked me where they can go to learn MetaStock. Now there is help available no matter where you live.

Simon Sherwood has been teaching people how to use MetaStock for years. At last he has written the book that has cried out to be written. And he has done a great job on it.

It is called *MetaStock in a Nutshell* and is published by Wrightbooks/Wiley and can be obtained through any bookshop in Australia. If you cannot conveniently get to a bookstore or want to buy it from home, call *The Educated Investor* bookshop on 03 9620 0885 and they will send it to you. You might even get to talk to Simon when you call.

The chapter headings will indicate the scope of the book:

- Some basics to Get You Started
- Now...On Doing Some Things (setting up charts)
- Indicators
- Build Your Own Indicator
- Layouts – Multi-Chart Displays
- Templates
- Favourites
- Custom Buttons
- The Explorer
- Odds and Ends (Sample screens and FAQ)

I am not a MetaStock user, so I cannot test the book myself, but I think I can see enough to know that this book is going to be really helpful to MetaStock users. It seems to be clearly written with lots of illustrated screens.
